

main/L0_System/DeviceSettings
Validator.hpp

```
graph BT; A[main/L0_System/DeviceSettingsValidator.cpp] --> C[main/L0_System/DeviceSettingsValidator.hpp]; B[main/L0_System/Orchestrator.cpp] --> C;
```

The diagram illustrates a header file dependency. At the top is a grey box representing the header file 'main/L0_System/DeviceSettingsValidator.hpp'. Below it are two white boxes representing source files: 'main/L0_System/DeviceSettingsValidator.cpp' on the left and 'main/L0_System/Orchestrator.cpp' on the right. Two blue arrows point from the source files up to the header file, indicating that both source files include this header.
