

main/L6_DeviceDrivers
/Mcp23017/EspMcp23017Device
Driver.hpp

```
graph BT; A["main/L1_Composition  
/Builder/EspBuilder.cpp"] --> C["main/L6_DeviceDrivers  
/Mcp23017/EspMcp23017Device  
Driver.hpp"]; B["main/L6_DeviceDrivers  
/Mcp23017/EspMcp23017Device  
Driver.cpp"] --> C;
```

The diagram illustrates a dependency structure where two source files, `EspBuilder.cpp` and `EspMcp23017DeviceDriver.cpp`, both depend on the header file `EspMcp23017DeviceDriver.hpp`. The header file is located in the `main/L6_DeviceDrivers/Mcp23017/` directory, while the source files are in `main/L1_Composition/Builder/` and `main/L6_DeviceDrivers/Mcp23017/` respectively. Blue arrows indicate the direction of the dependency from the source files to the header file.

main/L1_Composition
/Builder/EspBuilder.cpp
