

DeviceDriversContext
::GetTm1637DeviceDriverId

Led::SetState

Assert::Fail

```
graph LR; A[DeviceDriversContext::GetTm1637DeviceDriverId] --> C[Assert::Fail]; B[Led::SetState] --> C;
```

The diagram illustrates a control flow where two different functions, `DeviceDriversContext::GetTm1637DeviceDriverId` and `Led::SetState`, both lead to a common outcome: `Assert::Fail`. The source functions are represented by white boxes with black borders, while the assertion failure is shown in a gray box. Blue arrows indicate the direction of the flow from the source functions to the failure point.
