

ApplicationsTask::Run

I2cTask::Run

RtosTask::DelayTask

```
graph LR; A[ApplicationsTask::Run] --> C[RtosTask::DelayTask]; B[I2cTask::Run] --> C;
```

The diagram illustrates a flow where two separate tasks, 'ApplicationsTask::Run' and 'I2cTask::Run', both call a common function 'RtosTask::DelayTask'. The first two boxes are white with black borders, while the destination box is gray with a black border. Blue arrows indicate the direction of the calls from left to right.
